INTRODUCTION

Sound Leisure remain one of only a few traditional jukebox manufacturers in the world. Our range of Classic Jukeboxes retain many iconic styling elements associated with the golden & silver age of jukeboxes, including dome top cabinets, beautiful veneers, solid chrome castings, bubble tubes and a truly unique sound.

Where many of our competitors have moved towards mass production and low cost components, we insist on using the highest quality materials for the production of our Classic Jukebox range.

Sound Leisure is the only company in the world to produce a single piece, wooden back jukebox cabinet. This gives our products extra strength, improves the resonance and produces the unique jukebox sound. Only through such attention to detail can we achieve our aim of producing the highest quality jukeboxes available.

Our 80 disc CD mechanism is designed and manufactured by Sound Leisure specifically for our Classic Jukebox range. It is the simplest CD changer mechanism in the world.

Combined with our custom built 300 watt amplifier this delivers a formidable sound.

With a wide range of options available from custom cabinet finishes to wireless iPod docks, your Sound Leisure jukebox can be as unique as you are.

So, if your looking for a classic jukebox that offers the best in retro styling, the latest tehcnology and superb build quality, turn the page...

DAY 1

The process begins with the delivery and inspection of raw timber. Oak, American White Ash, Beech, Maple, Birch ply and a range of special woods and veneers that are required for our standard and custom built orders.

Our electronics division commence manufacture of the amplifier, main processor and all other electronic components.

DAY 2/3

The hardwoods are cut to size by mechanical planes and spindle moulders. Laminates are sent to the press.

The Birch Ply is cut to width and selected ply's are prepared with veneers.

DAY 4

The pre-cut ply is laid out in the forming press. Adhesive is applied to layers of material which forms the familiar dome shape of the outer cabinet. This is the unique process which produces a single piece Sound Leisure cabinet. The Ash ply's are similarly prepared and formed to create the front door hoop.

DAY 5/6

Beech components are machined creating the base frame and knuckles for the door.

By now the adhesives are set, firmly bonding the layers of ply together creating the raw cabinet.

Other assemblies such as the speaker chambers and cash box are pre-assembled.

DAY 7

The door hoop, knuckles and chrome castings are placed on an assembly jig and attached to the main door using traditional methods. The cabinet is fitted to the base and internal sections such as the mechanism shelf and speaker chambers are installed.

DAY 8

The cabinet and door are paired for the first time and hinges and locks are fitted. The assembled cabinet must now pass a thorough inspection before the two sections are separated again for staining and polishing.

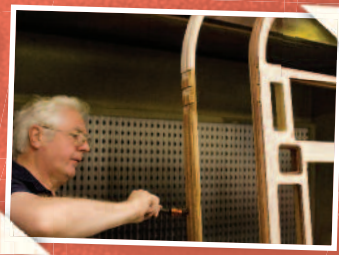

Creating a Classic

Sound Leisure use a host of traditional techniques and skills in the production of our Classic Jukebox range. Via apprenticeships and training we ensure our craftsmen and women develop the skills required to produce the highest quality cabinets. Through our extensive in house research and production facilities we are able to control the quality of our products right down to component level. We believe this offers a sustainable alternative to mass produced jukeboxes and gives our customer unrivalled choice and unbeatable quality.

DAY 9

The separated door and cabinet are rubbed down and two additional coats of polish are applied. Our experienced craftsmen and women continually assess the workmanship at this point to ensure the highest quality finish is achieved.

DAY 10

The two cabinet components are again joined together. Final checks are carried out before the completed cabinet is moved to the next phase.

DAY 11/12

All components and assemblies are thoroughly tested and approved prior to installation in the cabinet.

The front plastics, speaker grill, bubble tubes and front glass are fitted. The transformers, wiring, processor and amplifier are installed.

DAY 13/14

The jukebox assembly now enters the final phase where the CD Mechanism is installed. A comprehensive safety test is completed and all components are soak tested for a further two days to ensure perfect performance. A final visual inspection is completed before the Sound Leisure Classic Jukebox is issued a serial number.

DAY 15

Finally, the jukebox is complete. It is either packed and crated for export to one of our authorised distributors or loaded for delivery within the UK.

Reborn Classic

Originally launched in the wave of euphoria following the end of World War II, Paul Fuller's post art-deco design is one of the most popular jukeboxes ever made. Of the 56,000 original units produced only a few thousand highly treasured machines remain.

Sound Leisure took the decision to recreate the 1015 given the beauty, elegance and rarity of the original item. This stunning model is as close to the original 1015 as possible, belying the state of the art technology contained within.

Hand crafted with a single piece cabinet, adorned with solid chrome

castings, subtly illuminated with atmospheric lighting and enhanced by dancing bubbles the 1015 breathes ambience even when it is silent.

Truly a thing of beauty, this fantastic machine is a modern classic which embodies the spirit of the time.

Full Rocker or Slim Shaker?

WITH THE CHOICE OF FULL SIZE OR SLIM LINE CABINETS WE HAVE A JUKEBOX SOLUTION FOR EVERY LOCATION.

MANHATTAN

Manhattan Island, New York has always been about mixing style with fun. In the city that never sleeps, cocktails flow and the place jumps to the rhythm of life! Similarly, the Manhattan jukebox combines chic lines and a powerful sound that is guaranteed to be the talking point of any party!

MELODY

For those who always wanted a jukebox but didn't think they had the space, only Sound Leisure have the solution. Introducing the Melody...

The slim line Melody offers the same build quality and features as the Manhattan, however by reducing the depth of its cabinet by a massive 220 mm this beautiful slim line model can be located in almost any room.

Or Art Deco Class?

GAZELLE

Based on our Manhattan cabinet the Gazelle is styled on the original 950, released in 1942.

Boasting graphical elements inspired by the 1930's art deco movement, the stylised scene depicts gazelles leaping across the dome in vivid reds and greens. A second pair etched into the mirrored glass door panels continue the strong theme.

The dimensions for the Gazelle are the same as the Manhattan opposite.

Access to door lock is on left side of Manhattan and Melody cabinets.

“YOU MAY HAVE HEARD OF JALOPIES, YOU HEARD THE NOISE THEY MAKE, LET ME INTRODUCE YOU TO MY ROCKET 88!”

ROCKET-88

These are the opening lyrics to a hymn of praise to the joys of the Oldsmobile "Rocket 88" automobile introduced in 1949. More significantly the song, which was recorded around 1951 and attributed to Jackie Brenston and the Delta Cats, was nominated as the first true Rock & Roll record by the American Rock and Roll Hall of Fame.

Sound Leisure has christened its first 'Silver Age' jukebox the 'Rocket 88' to recapture the sights and sounds of this vibrant era. The Rocket 88 sits firmly in this genre with its style, detailing and truly vintage looks! The Rocket 88 features Sound Leisure's excellent 80 CD mechanism and a 300 watt 2-channel stereo amp drives the 5 way speakers to produce powerful yet crisp audio response. With remote control operation, coin mechanism fitted as standard and an optional iPod dock or bluetooth kit there is nothing vintage about the performance of the Rocket 88!

DIMENSIONS

Height : 141cm // Width : 78cm // Depth : 70cm // Weight : 120kg.

Access to door locks is required on both sides of the Rocket 88 cabinet.

Juke Britannia

The Who, Queen, The Sex Pistols, Mini Coopers, Pop-Art, 'The Italian job', all played their part in making the Union Jack an iconic symbol of fashion, style and rebellion. Now it's our turn to transform a classic '1015' jukebox into a kitsch collector's item!

The back cabinet features a section of the Union Jack flag and the front

door and knuckles are co-ordinated within the same colour scheme. Even the 'Diamond Pack' lighting system features sequences in red, white and blue and an iPod dock is installed as standard.

With a strictly limited production run of only 99 units, the Juke Britannia features a unique engraved serial number plaque and a

presentation certificate, making it a sure-fire future collectors item.

Height : 155cm // Width : 85cm // Depth : 70cm // Weight : 130kg

Digital Nostalgia

In 1877, Thomas Edison invented the phonograph, the first device in history able to reproduce sound recordings. Since then, innovators have sought to refine and improve the technology through which music can be stored and delivered. Likewise the jukebox has been adapted and reinvented throughout the years to enable it to continue to bring music to the people. SoundLeisure has made its own contributions to this colourful history, including producing the first ever digital jukebox in 1988.

Since then we have led the field in commercial digital jukebox technology and our market leading software is installed in venues all over the world.

Now for the first time our classic Jukebox cabinet has been manufactured to house Sound Leisure's unbeatable range of digital technologies. Available in full size Digital Nostalgia and slim line Digital Melody cabinets, both jukeboxes feature six way speaker systems and a 300w Mk7 amplifier.

Sound Leisure's Digital Classic Jukeboxes are available with two software options:

i. Milestones In Music Technology*

Sit back and let us do all the work for you. Based on Sound Leisure's award winning commercial jukebox technology, Milestone's features over 30,000 tracks including every single to feature in the UK Top 40 since 1960 plus a wealth of other essential tracks and albums. Now you can enjoy this ultimate

jukebox experience in your own home, including weekly automatic music updates* so you're guaranteed to have the latest hits at your finger tips.

ii. Jukebox Manager Software

Based on Sound Leisure's highly popular commercial jukebox technology, this option put's you firmly in control of your jukebox. Sync and transfer digital music to your jukebox from any P.C or network storage device using the Jukebox Manager software. Create and refine the perfect jukebox music library for you and your friends and update it whenever you feel like it.

KEY FEATURES

- * 15" TFT display with simple touch screen interface
- * LED Lighting
- * 300w MK7 amplifier featuring auto fade microphone facility and auxiliary inputs/outputs
- * Photo frame feature displays photos and images on jukebox touch screen
- * Comprehensive 'background music' feature enables automatic music selections to be profiled for different time periods.

* Milestones in Music package is subscription based and requires a broadband connection for online weekly updates. (DVD update option also available.) The music is licensed by Soundnet Limited for home use on a digital jukebox only. The music may not be recorded or copied except permitted by law or otherwise agreed in writing. Under the terms of the license issued to SoundNet by Phonographic Performance Limited the music is rented to the customer only while while an active monthly subscription is maintained.

Custom Shop

BUILD YOUR ULTIMATE JUKEBOX

As Sound Leisure manufacture every jukebox to order we can customise the finish to your exact requirements. For example we offer a choice of jukebox cabinet finishes from Light Oak through to Sapele Mahogany. It is even possible to colour match the jukebox cabinet to an existing wood finish, ensuring your jukebox blends perfectly with your home.

In addition we can provide a wide range of stunning colour matched painted finishes from textured ice white to our Platinum Grade, high gloss piano black (see opposite). In short, we can provide a custom product which will compliment your environment perfectly.

Adding an integrated wired iPod dock or bluetooth kit to your jukebox is an excellent way to expand the choice of music and ensures it's quick and easy for everyone to bring along their favourite tracks.

The custom element of your jukebox need not stop at the choice of finish. Increase the wow factor of your jukebox with a custom glass, enabling messages or logos to be featured on the front glass of the jukebox. Our stunning Diamond Pack lighting system gives a beautiful effect of colour and mood and is a must if your a lover of gadgets! (see Diamond Pack pg 16)

Over the years Sound Leisure have produced hundreds of customised jukeboxes. From custom etched mirror design to custom paint jobs virtually anything is achievable and we are happy to provide a quote for you to build your dream machine.

Platinum Grade

HIGH GLOSS CABINET FINISH

The stunning 'Platinum Grade' high gloss cabinet finish needs to be seen to be believed!

Available in a wide range of colours including stunning Piano Black and sublime Crystal White, this optional cabinet treatment adds elegance and sophistication to any jukebox. Pick from one of hundreds of RAL colours to ensure your Platinum Grade cabinet reflects your personality.

Diamond Pack

ADD A DASH OF FLAIR TO YOUR JUKEBOX WITH THE DIAMOND PACK LED LIGHTING SYSTEM

Make a dramatic impact with the 'Diamond Pack' lighting option. Instead of the traditional lighting bars and coloured pilaster rotisseries, we pack the dome and side diffusers with the latest LED technology!

Specially designed in-house at Sound Leisure this system is low heat, energy efficient, ultra reliable and SUPER BRIGHT! The LED lighting system gives you total control of the jukebox illumination, so you can match the colour to suit your environment or mood. As it crossfades between infinite

colours and tones use the remote control to pause the lighting on any colour you choose. Alternatively select one of the pre programmed colour patterns and sit back and relax.

Default lighting patterns include:

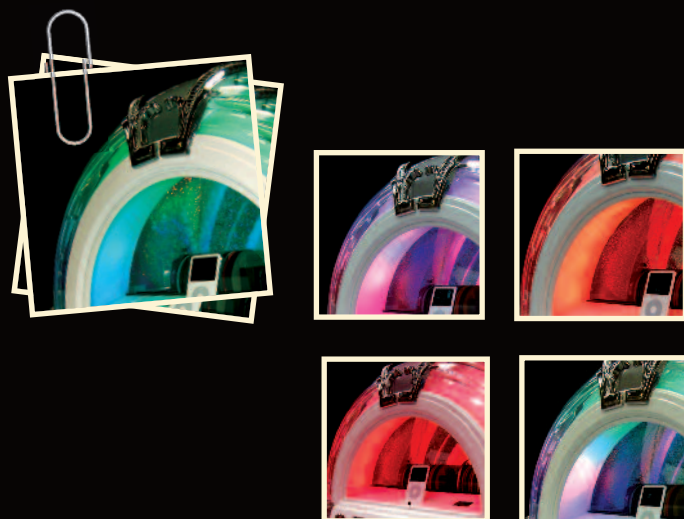

Antique: This rotates the colour scheme up the side pilasters replicating the rotisseries found in the original 1940's machines. A classic look.

Disco Lightshow: Sound to light sequencing offering a vivid display of all

colours as they flash in time with the music. Great for parties.

Available to order on new machines, the 'Diamond Pack' is visually stunning and has to be seen to be appreciated. Visit our web site for details of our next exhibition or call us to book a private appointment.

DINER SPEAKER

Diner Might!

Either as the perfect companion to your Sound Leisure Classic jukebox or just to add a touch of "Diner" to your kitchen our retro speakers are guaranteed to be a talking point when hanging on your wall kicking out some sweet sounds!

TEARDROP SPEAKER
With a look reminiscent of a classic "Harley Davidson" motorcycle fuel tank, Sound Leisure's Teardrop

Speaker combines the 50's aspect of fusing automotive elements into everyday design. Each shell is manufactured from tough poly carbonate and features solid aluminium cast and chrome plated adornments. The sound itself emanates from a 6.5" full range speaker mounted to a strong back board allowing for easy wall hanging. The sumptuous woven speaker cloth adorned with a laser cut steel

"Sound" adds the finishing touch to a true masterpiece of retro design.

DINER SPEAKER
A core internal cabinet of marine ply offers rigidity and strength allowing the full range 6.5" speaker to remain focused on providing a good and even sound while the sleek acrylic side contours and steel faceplate and grill give these speakers their distinctive and

attractive shape.

Both designs are available in Royal Blue, Hot Rod Red, Cream, Silver and stunning Chrome finishes. These mouth watering speakers from Sound Leisure are unlike anything you've seen since the fifties!

UNLEASH THE POWER OF YOUR DIGITAL MUSIC LIBRARY THROUGH OUR RANGE OF CLASSIC JUKEBOX CONNECTIVITY OPTIONS

Digital music technology has revolutionised the way we discover, share and listen to music, just like the original jukeboxes when they first appeared.

Sound Leisure's range of jukeboxes are built with respect for the past but with an eye on the future. Try one of the following options to connect your digital world to your classic juke:

* iPod dock* Hard wired iPod dock for quick connectivity

* Bluetooth Wireless Audio - Connects any AD2P Bluetooth audio device to your jukebox. Flexible and easy

* SONOS integration* State of the art, full featured digital music integration

Each option can be seamlessly integrated without compromising the appearance of the jukebox, giving you the widest choice of music technology while retaining the fine styling of your Sound Leisure Classic Jukebox.

*iPod Dock and Sonos integration must be specified at time of order.

CLASSIC COLLECTION

Sound Leisure are delighted to introduce our range of classic merchandise. Here you will find a great range of gifts for any jukebox aficionado from cufflinks to wireless headphones.
